The Solution To Cataracts Is Clear

The Non-Invasive Alternative:

 ADER
PetVisionPro®

NO N-A-C

 ADER

PetVisionPro[®] eye drops is a nutraceutical ophthalmic product and has proven to be a highly effective and safe treatment for alleviating Cataracts and Dry Eye Syndrome (KCS)

Reduces the opacity in the eye lens (***Cataracts and Lenticular Sclerosis***) and assist in maintaining its clarity.

Highly effective and safe for relief of pet eye irritation and dryness (***Dry Eyes Syndrome***)

Treatment With PetVisionPro®

Apply 2-3 drops in the effected eye(s),
2-3 times a day, for a minimum of 30 days.

*NOTE: Typically, you will begin to see results after use of the
first package of PetVisionPro*

How It Works...

Removes the damaged proteins in the eye lens.

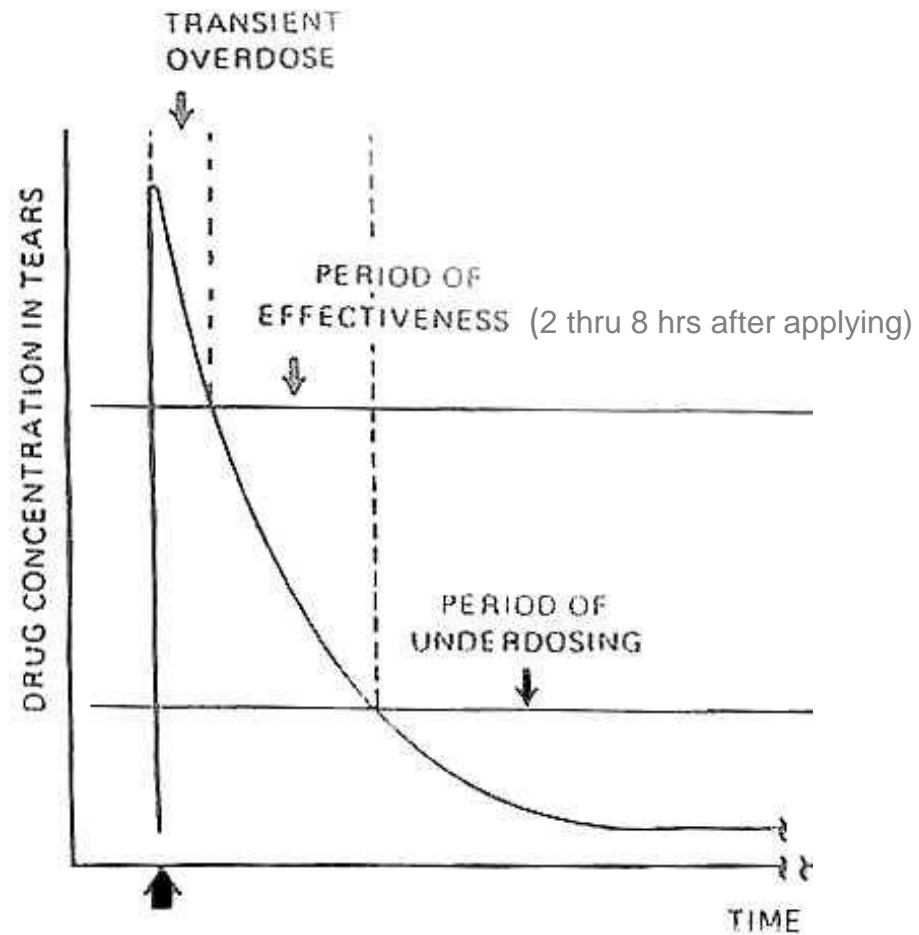

Promotes development of new proteins in the eye lens.

Improves the transparency of the eye lens.

Highly effective and safe for relief of pet eye irritation and dryness.

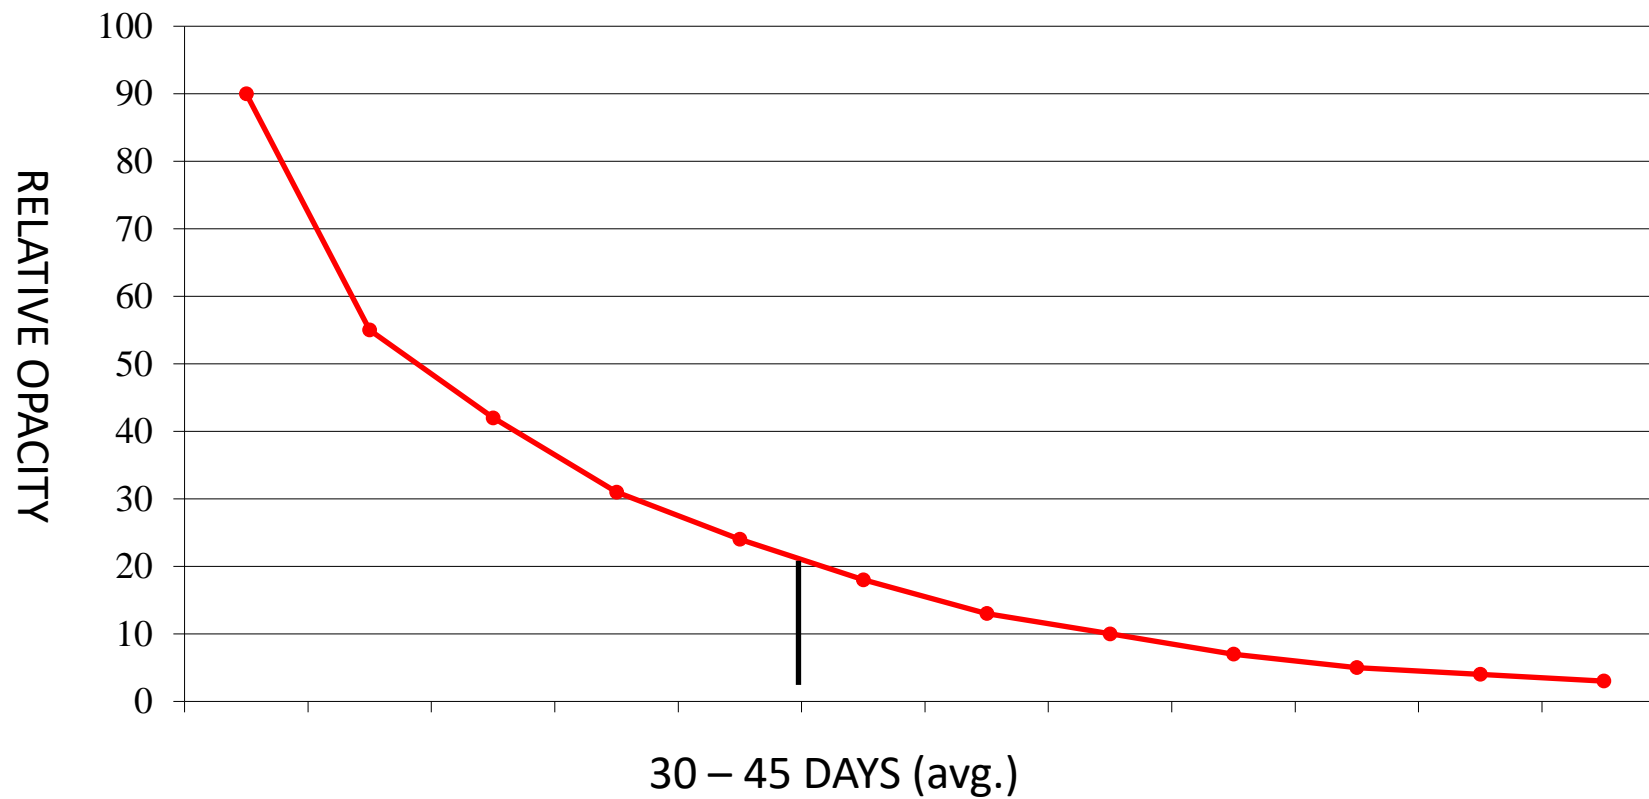

Period of Effectiveness

Duration of Treatment (avg.)

ADER PetVisionPro®

Note: Sold thru Veterinarians only. 4x more potent than regular PetVision® (OTC).

CATARACTS...The Solution To Equine Cataracts Is Clear

EquiVision[®] ADER

EquiVision[®] is a nutraceutical ophthalmic product, thoroughly tested and proven to reduce the opacity due to cataracts in equine eyes (specifically due to Equine Recurrent Uveitis) and assists in maintaining eye clarity. Because there is not a lens available for Equine surgical use, EquiVision[®] is the only non-surgical solution. EquiVision is a non-invasive alternative requiring only a few drops in the affected eye, a few times daily. After alleviating the cataract then EquiVision is used every 6 months to prevent reoccurrence.

FOR MILLIONS
OF DOGS AND CATS.
THE WORLD IS A
BLUR.
